

Advanced topics in  
audio/video conferencing

9<sup>th</sup> SURA/ViDe conference

Atlanta, USA

# Outline

- Intro...this is it 😊
- Numbering
- The development of high definition video (U. Schwenn, MPG (remote))
- Security topics
- ...other stuff...

# Intro

- Why do we have this workshop?
  - Participants at this conference have different backgrounds, some are novice, some are advanced users/admis, and (most) are professionals in audio/video conferencing → maybe we then need different (advanced) topics
  - Last years workshop showed a great interest (so hopefully this years workshop will be as interesting)
    - I did learn thou not to overrun the time 😊
- Which topic to chose???
  - Always tricky, as everybody has their “personal” agenda
  - Topics of recent discussion on the Megaconf list (and various other lists, eg. TF-ECS, vide-member, ...)

# Now it's your turn

- Who are you?
- Why are you here?
- ...any other info you want to share with us?

# Thank You
